THE 24HR TECH: 2nd Edition: Water Damage Profits And Training In ONE DAY (Claim Clinic Restoration Training Series Book 1)

THE 24HR TECH

Step-by-Step Manual to
Increase Mitigation Profits
and Reduce Training Time to Just
ONE DAY!

Synopsis

The 24-Hour Tech is a training manual for those in the water damage or restoration field. This manual walks the reader through the 20-Step Mitigation Process. It is intended as a complete training manual for new Water Damage Technicians who wish to quickly learn how to properly document insurance losses involving water damage. Andrew McCabe developed this process over years of water damage claims experience. He still uses it today in his consulting practice Claims Delegates. If you want to learn quickly how to properly document and perform water damage mitigation, without paying for an expensive certification class, The 24-Hour Tech is perfect for you. The process and manual are also the perfect complement to recent grads of WRT or ASD training classes. You may understand HOW to dry a structure, but The 24-Hour Tech teaches you how to get PAID by insurance companies. The results of the 20-Step Mitigation Process are meant to be handed to a professional Xactimate estimator and allow them to quickly create comprehensive estimates for insurance adjusters and carriers.

Customer Reviews

This will hopefully eliminate a lot of frustrations because of its one-step-at-a-time approach! Excited to roll it out to our techs!

I wrote this manual to help my clients make more money. And it works.

Love the book.. I'm a business owner, adding this on to my current carpet cleaning services. I wasn't sure which direction to go after I got iicrc certified.. I have never done flood remediation before. I have since read the book 3 times, and did the sheets along with them.. I know have a good understanding of the process that needs to happen when you get called on a job.. it's a great book and it's very organized.

Andrew breaks down the entire process from beginning to end. It is extremely simple, but also thorough. This is a great foundation to any restoration company's water damage process. Great read!
