Customer Reviews

I bought this item to accompany a Japanese language class I was taking. My wife and I are going to Japan and we decided it would be great to use in the car on an extended road trip we were taking prior to leaving. Easy to use and follow along. Good beginning phrases and expressions. JB

After hearing a sample track for this product, I was interested in the concept of telling a story while

teaching a language. I knew things were going to be different however when I uploaded it to my mp3 player and saw the total run time was barely two hours. Regardless of how good the program may be, that is far too short a time to teach anything worth while. To my unpleasant surprise the opening intro is actually about a fourth of the entire audio "story" itself. There is a great deal of potential here, but none that is realized. Dr. Blair's "amazing new method of language learning" consists of memory association, a tool that can be useful or completely counter-productive. For example, one of the first phrases introduced in the lessons is "ohyasumi". It tells us to remember it like someone saying "oh ya? sue me!" in English. Now does that make any sense? Wouldn't it make more sense to memorize the actual meaning of the word, (rest, break, day off) then to memorize several english words that do not even relate to it? Aside from a few exceptions, all of the phrases are introduced to you in this way. And while I could easily remember the non-related english words I did in fact have to look the word up to write this. I have purchased many Japanese audio products to listen to at work and this is by far the worst. You will make confused associations learning this way, and later on when you try to use the actual meanings will find it much like trying to drive on the other side of the road in Europe. Dr. Blair should include a personal apology on each box of this product.

...because it offered ridiculous ways to remember the terms like "ohaiyoo gozaimasu" like "picture the state of Ohio with the sun coming up and it's going to a moss in the shape of an "I." Uh...no thanks. I'd rather just memorize this term by rote. Also, the pronunciation isn't quite right (it's "ohaiyoo" with an extended "o" sound at the end, rather than the shorter "o" at the end of "Ohio." There's a distinguishable difference between how the narrator speaks and how the other speaker pronounces the words; the latter sounds more like a native Japanese speaker. The story used to integrate the vocabulary was absurd and paced too quickly. It might have been enjoyable simply as a story, because it was a Douglas Adams kind absurd, I don't think it was helpful for language-learning.

Before you buy this product, ask yourself...Can I remember the Japanese meaning of "good morning" by thinking of the state of Ohio and moss? "Good morning" in Japanese is "ohayou gozaimasu". That's an example of how this program works. It tells you a lame way of remembering how it's pronounced, but that doesn't relate at all to it's meaning. While I like the idea of using a story to learn a language, I'll give it two stars. But, it's used poorly here. The story is uninteresting, and it's not even woven into the material very well.

I've listened to several of the language programs in this series, and I'm consistently impressed by

the freshness and effectiveness of their approach. Though the programs have their comic side--hard to believe in a language instruction program--they have clearly been put together with expertise into the language learning process. I'm no linguist, but the mix of techniques seems to be a significant improvement over the rote vocabulary rehashes of other series. The CD-ROM full of information and practice tips just puts it over the top. A great program and a great value!

Sure it's silly at times, but that's the fun, right? Even if the mnemonics don't make much sense, they still work! After 6 years of studying Japanese the boring way, I was overjoyed to have my kids listen to THIS program. I would have felt like an evil green monster if I told them other programs were fun.

I have listened to many different language programs, and this one is by far the best. This one is actually fun to listen to and I've learned so much so quickly. Most informative and great value!
