Ed Emberley is the Caldecott Award-winning author of the popular Drawing Book series, as well as the best-selling Go Away, Big Green Monster! He lives in Ipswich, MA.

All I can say is you can't go wrong with Ed Emberley art books. I am an art teacher and I love using the examples in here to show students that everything is made up of basic geometric shapes (square, triangle, and circle.) These exercises/examples are great for having people of all levels of art to really break down objects into basic geometric shapes. Also if you are into scrapbooking the exercises in here are great for you to create some wonderful paper crafts. The examples are given in easy to follow step by step picture instructions. There is a lot of examples to follow that are easy and fun to do :0)

I work in a school and was able to use this book with children ranging from 8-15. All of the kids enjoyed getting to pick out which animal they would like to make and then creating the stencils. As an occupational therapist, this book helps to integrate executive functioning, motor planning, coordination, and fine motor skills with cutting and gluing. It is an amazing tool to use!

I love Ed Emberley's drawing and fingerprint books, and this is a fun alternative that sort of expands a young artist's repertoire. Get this and the EK Tools Circle Punch, 2-Inch, and a stack of colorful origami paper.

This is really fun. My granddaughter and I are having a ball.

A great book to use if you need a new and more creative way to teach fractions in the classroom. I used the simpler patterns with my first grade students and went very slowly, step by step creating the images with them. They had a blast! There are MANY complex designs/patterns to work with, which are better geared towards older students, such as 4th, 5th, and 6th grade students. Overall though, my first grade class had a great time adding art to math using the creations of Ed Emberley. I'm looking forward to checking out some of his other books!

as expected

This is a fun book for toddlers and up! Ed Emberley provides lots of ideas / directions for making flowers, insects, animals, borders etc. using only circles! To make it easier, we bought some circle punches in a variety of sizes. Add some paper and glue and you're set to make all sorts of pretty things! My 4 and 6 yr olds both love it. We also own Picture Pie 2, but find this is the easier book to use just because we can use punches instead of tracing and cutting. Lots of fun!
