Case Reviews In Ophthalmology E-Book

Synopsis

The case study format used in Case Reviews in Ophthalmology, 2nd Edition has been proven to be a highly effective way to incorporate medical knowledge with clinical judgment – resulting in the best possible results on practical exams. More than 140 relevant cases cover every aspect of the field: optics/refraction; neuro-ophthalmology/orbit; pediatrics/strabismus; external disease/adnexa; anterior segment; and posterior segment. Large photos highlight each case, enhancing your knowledge and reinforcing key aspects of diagnosis. Seasoned authors Neil J. Friedman and Peter K. Kaiser provide the exact guidance you need to assess, reinforce, and broaden your mastery of every essential concept in ophthalmology for clinical rounds, oral boards, or recertification. Clear clinical photos, scans and histological images used throughout to help improve diagnostic precision and draw attention to the intricacies of each disease. A consistent presentation style features one or two case photos and questions on one page, with answers and discussion on the following page. Expanded to include 30 all-new cases bringing the total to more than 140 illustrated scenarios.

Book Information

File Size: 107536 KB

Print Length: 313 pages

Page Numbers Source ISBN: 0323390595

Simultaneous Device Usage: Up to 4 simultaneous devices, per publisher limits

Publisher: Elsevier; 2 edition (December 21, 2016)

Publication Date: December 21, 2016

Sold by: Amazon Digital Services LLC
