Tuttle Korean For Kids Flash Cards Kit: (Includes 64 Flash Cards, Downloadable Audio, Wall Chart & Learning Guide) (Tuttle Flash Cards)

Synopsis

A fun and kid-friendly introduction to Korean! The Tuttle Korean for Kids Flash Cards kit is an introductory Korean language learning tool especially designed to help children from preschool through early elementary level acquire basic words, hangul script, phrases, and sentences in Korean in a fun and easy way. The flashcards can be used as a learning tool in a classroom setting, at home, or anywhere that learning takes place, and can easily be taped around the room for an interactive way to learn Korean. The set contains a total of 64 words organized into thematic categories, including: My Family, Colors, Numbers, My Day, Food, My Body, Clothes, and Going Places. All of the words are illustrated – the pictures serve as effective visual aids to help children learn and remember each word's meaning. Words often reflect cultural objects and items and can be studied in any order. Learners may focus on one theme at a time or mix them up for a little more variety.

Customer Reviews

I really like this set. There is a large wall chart with the common words/phrases and basic information a child and beginning learner (adult) would find useful (counting 1-10, colors, persons in a family, etc). I also found the CD to be helpful to listen for correct pronunciation and intonation of the voice. My children also like the songs included on the CD. On the back of each flash card, there are sentences written in Korean (with English phonetics) on how one might use the word in basic conversation. I found it a great learning tool to use in addition to other books we have. My only disappointment--I wish there was a wall chart of the Korean alphabet to help my children better understand what each character sounds like on it's own. Other than that, it's a great product!

I bought this product for my 3 year old so I can introduce the Korean language to her. It comes with laminated flash cards, poster, and cd. My daughter generally learns well with flash cards, so it was perfect for us. It is very basic, which she needs. We put the poster up in her room, so she can look at it whenever she wants too. Also I turned on the cd when she was coloring and she recognizes some of the words. I am sure the more we review the cards she will be able to recognize the words on cd. My only complaint is that the cards and poster have phonetic translation but it can be confusing for little ones especially if they are learning to read. For example, stomach is "be" and the 'e' is pronounced as a short sound but my daughter reads it as long 'e'. So it looks like the American word "be". But either than that, I really like them and may invest in the volume 2, if everything goes well.

Since I'm half Korean and was raised by a Korean mother and American Military father, I wanted to reconnect with my heritage by learning a little more about the Korean language! I remember my mother learning the English language through my grade school homework up until high school. Now the tables have turned. After I graduated from college, got married and started my own family, my daughter wants to learn with me as I'm learning with her! My mom even tutors both of us! A great way learning another language and engaging family fun!!! The flash cards with the cd and book helps out even without a native speaking mom! lol (Ommaya sadanghayo!)

These were great but confusing. Since I used them and remembered the words but then when I used them with Korean speakers they didn't know the words and used another word. I understand different regions... different dialects... Still great product. Quality cards, fantastic poster/chart for learning and a great CD you can listen to on the go.

Pros. I like that different learning tools (poster, cards, CD) are included in one kit. The animation is bold and colorful. Cons. I found a mistake in the grammar in one of the cards, and the pronunciation on the CD is a bit American as if it were recorded by a Korean American. It is not a big deal, though, unless, like me, your purposes are for fine tuning. My students are beginners, however, so it wasn't a hindrance.

My 7 year old daughter loves these flash cards and the CD it came with. The flash cards are great quality, colored, and laminated. They have the phrases and words spelled out in Korean with the meaning in English as well as the pronunciation in phonics underneath the Korean sentence with a picture. The CD has 2 songs on it. Happy Birthday to you and also Head and Shoulders, Knees and Toes. It also has some common words. The narrator is easy to understand and speaks with a pleasant and clear voice. Also came with a large poster. This was a great buy and I would recommend it.

I love this product. It is very informative and easy to use. I take the CD with me in the car when I am commuting back and forth to school and it is an excellent tool for exposure to the language at least 30+ minutes a day. The details on the backs of the flash cards are very helpful as well; as well as the small grammar tidbits. I would recommend this to any beginning learners of Korean. It is a good tool to use along side of your regular text books and work books.

My 7 year old daughter loves K-pop and watching dramas with me. I myself am trying to learn Korean as well. While these cards are okay, I prefer using the app on my phone. It is easier for both of us to hear the words pronounced by a native speaker, as opposed to us guessing and butchering when using the flash card. A good tool to use in conjunction with an audio lesson though!
