Customer Reviews

James Stamp: "Warm-ups & Studies for Trumpet and Other Brass Instruments"

The Stamp Warm-ups & Studies book is a valuable addition to any trumpet player's library.

However, the CD that continues to be included in the product description is NOT included. Instead the product contains a link for downloading the tracks in an MP3 format which is not as versatile for playback as a CD format would be. I recommend the Roy Poper's Commentaries on the Brasswind Methods of James Stamp as a companion.

While this book is best used in conjunction with a private teacher, preferably one that studied with Jimmy Stamp, it is still a great resource and the material is very well laid out. The instructions on how to play the warm-ups and studies are clear and the CD completes the package. I am a trombonist and I use these studies transposed in the proper range for my instrument. For trumpet players this book is a must have.

It's an amazing book, and key to the whole James Stamp method. But, don't buy it for the absurd price here... JW Pepper has it for like ten dollars. That's where I got mine.

This is a really good book! I use it a lot for one of the first parts of my warm-ups. It helps me to loosen up and play with less tension. Glad I bought it :)
