Aza-Crown Macrocycles (The Chemistry Of Heterocyclic Compounds, Vol. 51)

Synopsis

The Chemistry of Heterocyclic Compounds, since its inception, has been recognized as a cornerstone of heterocyclic chemistry. Each volume attempts to discuss all aspects – properties, synthesis, reactions, physiological and industrial significance – of a specific ring system. To keep the series up-to-date, supplementary volumes covering the recent literature on each individual ring system have been published. Many ring systems (such as pyridines and oxazoles) are treated in distinct books, each consisting of separate volumes or parts dealing with different individual topics. With all authors are recognized authorities, the Chemistry of Heterocyclic Chemistry is considered worldwide as the indispensable resource for organic, bioorganic, and medicinal chemists.

Book Information

Hardcover: 896 pages

Publisher: Wiley-Interscience; 1 edition (April 26, 1993)

Language: English

ISBN-10: 0471524859

ISBN-13: 978-0471524854

Product Dimensions: 6.5 x 2 x 9.4 inches

Shipping Weight: 3.2 pounds (View shipping rates and policies)

Best Sellers Rank: #8,920,031 in Books (See Top 100 in Books) #44 in [Books > Science & Math > Chemistry > Organic > Heterocyclic](#) #308 in [Books > Science & Math > Chemistry > Polymers & Macromolecules](#) #22109 in [Books > Textbooks > Science & Mathematics > Chemistry](#)

Customer Reviews

Complete coverage of aza-crown and cyclams incorporating information on properties, uses and synthetic techniques for both classes of compounds. Contains detailed tables of all aza-crown macrocycles prepared to the end of 1990, expansive references and notes on nomenclature.
