Our books make it possible for every trip to be a trip of a lifetime.

I go back and forth between Fodor, Rick Steves, Frommer's, Lonely Planet, and Rough Guides to find the right one for a specific purpose. Some of the guide books are better than others, some are more useful for planning and background, while others are perfect to take along with you in case you need to dig deeper to find nontouristy things to do. This book was helpful for both planning and while touring. Written and presented in clear, precise language, it told me what I needed to know about the sites. More comprehensive than most of the others, I relied upon it to find some out of the way places beyond the main tourist sites. I bought the Kindle edition and kept it on my iPad and iPhone so it would always be handy as a reference. I used it frequently. A good choice for planning and touring many parts of France.

I looked at guidebooks at a local bookstore before ordering this-it's a nice size (though a bit heavy) and had lots of useful information.

Perfect for our recent trip to Paris and Bordeaux.

Fodor's guides are always helpful and relatively easy to use.

This is a really good guide for planning and dreaming at home. If you want to take along specific pages (restaurants, maps, tourist sites, etc.), I recommend you get an X-Acto knife & cut the book up & take those pages with you. You really do not need the hotel info if you've made reservations, etc. This is an 877-page book - too big IMO to take it all with you unless you are going to every part

of France. If you are a return visitor or first-time, the "France Today" section gives a general overview of atmosphere & what's hot in France. I also like the "Eating & Drinking Well in France" each part of France - the book highlights the food & drink the area is known for. The section on Paris is very good. I like how it is organized & the "What's Where" pages that show the Paris arrondissements and all the top sights (& more) with advice for how to avoid the biggest crowds (there are always crowds no matter the season). There is information on side trips outside/near Paris & travelling with children. The dining section gives restaurant options in each arrondissement & there are also maps with restaurants marked with orange squares. The same goes for sleeping accommodations except they have a blue square. The "History You Can See" section is an interesting way to help you decide where you want to spend your time in France. For example, if you are interested in Ancient France you may want to visit Carnac in Brittany or Roman architecture in the south. The guide goes on to give advice on etiquette, what to pack (Parisians/French dress nicely & you should too), how restaurants work (it's quite different than in the USA), general information on France and overview of the country. The top sights for each section of the country is well done. There is a section on French vocabulary basics which should get you through. My advice is to at least learn basic words (& use them!) like: please, thank you, pardon, hello, goodbye - you will be amazed at how much more friendly people are if you are courteous & learn a few easy phrases/words. There are maps that are OK - good for planning. There is also a Metro & RER map. I always use the much more detailed & laminated "Streetwise Paris" map and buy Michelin maps (if I am driving) for the specific areas when I get to France. This is a lovely book & well-organized with good information. Its real value is whetting your appetite with the photos & helping you whittle down your itinerary - decide what you want to spend your precious time/money, doing/seeing.

For two years, I worked at the University of Grenoble in France. I have made several trips back to France since then. During my years in France, I had lots of time to explore. France essentially shuts down in August. It seems like everyone heads to the ocean or the Mediterranean. Each summer in August, when my university closed, I took off on bicycle. At an easy pace of 60 miles per day, I was able to do 1200 miles in three weeks. I have also traveled in France by train and auto. Every month or two, I would find my way to Paris by train. It really is the cultural center of Europe, if not the world. You cannot move without tripping over a museum or historical site. I hung out with friends, French and American, but I did a lot of exploring on my own. For Paris, I choose the Orangerie for the Monet Water Lilies. How did Woody Allen get permission to film a scene for *Midnight in Paris* in front

of the Water Lilies? It may have helped that Carla Bruni, a cast member, was married to the President of France. The Fodor's Essential France provides good coverage of attractions, cultural institutions, and museums. It also describes shopping, restaurants, and hotels. My first impression was ÅfÃ¢ Ä ¬Ã ¦ OMG look at the size of the thing. It is over eight hundred pages! The guide is a lot to take in at once, as is France. It does include many of my favorites: Avignon, the Mediterranean Coast from Nice to Monaco, Chartres, The Bayeux Tapestry, Mont St. Michel, and Carnac. I did not find a mention of the Tour de France. Watch it on TV in July to see how beautiful the country is. The guide is sketchy on alpine ski areas. It omits Alpe d'Huez and Chamrousse, Olympic areas, where I learned to ski. The Piste du Tunnel at Alpe d'Huez used to be my favorite. You pole through a tunnel cut through the mountain at 3,000 m (10,000 ft), then exit, and oh!!! See photos. My advice: see Paris, put up with the Parisians, and then get out of town. The further south you go in France, the nicer the people are. Bicycling through the Alps from Grenoble to Nice (two hundred miles, three days), we encountered a spring snow storm going up a mountain pass. A woman came out of her house to ask if we needed anything! I recommend the Rhone Valley, the Alps, where I used to live, and the Mediterranean. Go to the Rhone Valley for the wine, to the Alps for the skiing in the winter, and further south to the Mediterranean, where the scenery is terrific and the weather is mild all year round. As for this guide, I find that it is heavy on descriptions in small text, but light on photographs. I prefer the Lonely Planet guides, which have more photos. You cannot do all of France in a week. You can skim through the Fodor's and then choose a region. Despite its eight hundred pages, it is not detailed enough. There are many regional guides available from Lonely Planet, Fodor's, Frommer's, Michelin, and others. Read the guide, but leave it at home. Use the regional guides for your travel.
