Buy Gold Save Gold!: The \$10 K Logic

Synopsis

"Buy Gold Save Gold! The \$10 K Logic" examines 44 graphs of national debt, M2 Money Supply, The Dow Jones Industrial Average, expenses for U. S. government programs, prices of crude oil, silver and many more to show why most prices, including gold, have increased exponentially for over 100 years. Based on analysis of those 44 graphs, calculations from Jim Sinclair and James Rickards, a gold valuation model, and time cycles, the price of gold will reach \$10,000. This study explains the logic of much higher gold prices with easily understood graphs and text. Hyper-inflation, if the Federal Reserve and the U.S. government choose that path, will quickly devalue the dollar and push gold prices to astronomical levels far higher than \$10,000. The author is the writer and owner of the website www.deviantinvestor.com. Foreword was written by Bill Holter.

Gary Christenson is the owner and writer for the popular investment site www.deviantinvestor.com. He is a retired accountant and business manager with over 30 years' experience studying markets, investing, and trading. Many years ago he did graduate work in physics. He lives in Granbury, Texas with his wife.

Provides a comprehensive summary of all of the factors that will lead to a dramatic increase in the gold price. If you are a die hard anti-gold fanatic you will not like this book. The conclusion that gold is destined to rise quickly in the near future is hard to dismiss after reading this book.

Very useful for those of us tired of seeing paper assets going up and down like a roller coaster every

time the latest scandal or political figure pops up. Christenson does not try to sell you anything. This is a "just the facts ma'am" exposition; look at the math and consider if you could use a gold lining the next time you heard yourself saying "how could this happened? when reading about next bubble scam.
