Where can parents learn how to help the schools help their child? What do you tell the school once a diagnosis has been made? Where can teachers learn how to teach these children? Where can you learn to help your child? In Teaching The Tiger

Innovative methods of teaching children with Attention-deficit-disordered children, Tourette syndrome in children, Obsessive-compulsive disorder in children. A guide for parents and teachers.

This is a great book! My daughter has Tourette's, ADHD and Anxiety. I am always looking for ways to help her with her homework. She is 8 and in the 3rd grade. She is struggling in math, reading and with written expression. I brought this book to my last meeting for her 504 plan and showed everyone some of the ideas that may help her. I have been looking for a book to give me something that would let me know how I could help her. This book gives some great ideas. I will also be using some of these ideas at home with her. I only wish I knew about this book sooner!

I love this book, which I have found invaluable in educating my son's teachers about the disorder. It

is basically a compilation of information that any well read TS parent has probably found in 20 different locations, but for the novice looking for a thorough overview in one book, "Teaching The Tiger" goes a LONG way toward increasing their TS education. It gives practical advise re behavioral interventions that work, and more importantly those that DON'T. I find teachers are more receptive to this book because it is written specifically for teachers (rather than taking advise/instruction from a parent). I've found it to be quite credible and informative to them. I believe the answer to stigma, ignorance, and misinformation (ex: the 20/20-60 Minutes/media representation of TS), is education. This book provides it, specifically aimed at giving teachers tips on dealing with TS in the CLASSROOM environment. My son's teachers have been really grateful for these TS-specific insights. If you can afford the \$35 for this book, DO! It is a worthwhile investment into making your child's educational road a smoother one. In the meantime, you may be able to do what I did. I borrowed a copy from the library and made photo copies of the most relevant chapters for each teacher/aide involved with my son. I also either showed them the book itself or made a photocopy of the cover, in case they wanted to purchase/borrow the entire book themselves. If you have a good relationship with the principal or school librarian, suggesting that the school purchase a copy for the staff library is also practical. Those are my two cents, on "Teaching The Tiger". "Taming the Tiger" came first and provides a similar compilation of info for parents and others learning about TS. I hope you'll check out these books for yourself. AMM

A lot of clearly written and straight forward information. This book has been very useful for me. Lots of suggestions and tips for making the classroom experience more successful for these kids.

Great reference and easy to understand. A must-have for parents of. Hundred with Tourette Syndrome and OCD.

This is a nice edible book. A must have for parents with children that have Tourette's syndrome and ADHD/ OCD. Book was in great condition I bought another book for my sons school.

This is a must have book for anyone who has to deal with an ADHD child on a daily basis. I can't believe more educators are not aware of this book. This book is meant for proactive parents/teachers who are willing to make daily changes. Must have!!

Invaluable resource for teachers or anyone who works in a classroom setting! The binding makes it

easy to photo copy individual sections.

I am so happy to have this information. It has helped us with my grandsons problems in the classroom. Thanks
